

THE Fire Place

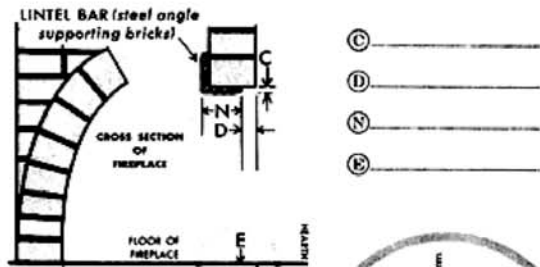

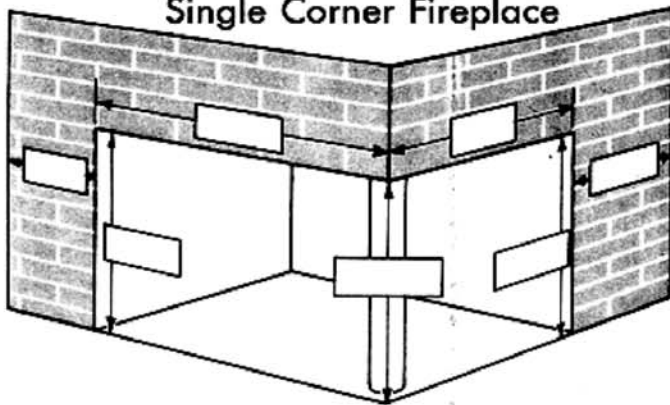

16165 SHADY GROVE ROAD, GAITHERSBURG, MD 20877
SALES@EASYFIRESUPPLY.COM 301.990.6195

Please print exact measurement in rectangle between arrows. Measurements should be taken with steel tape and should be accurate within 1/16 inch. We make all allowances for overlap and clearance of hearth unless otherwise specified.

Single Corner Fireplace

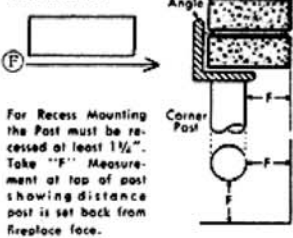

On recessed screens the curtains hang one inch back from face of fireplace. The E dimension is to show the drop to the floor of fireplace at this point, if there is a drop. Height of screen can then be made long enough to hang behind the hearth level.

(E) Arch

Flat _____ Full _____

FOR ALL CORNER FIREPLACES:

Curtain Draw Arrangement with Simpull handles. Our Custom Order Department will use method best suited unless preference specified.

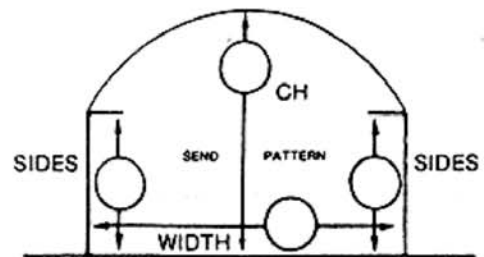

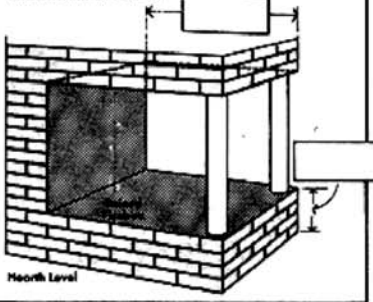

This form covers only the most common variations in fireplace construction.

If fireplace has UNUSUAL conditions, include separate diagram with measurements. OFTEN an actual PHOTOGRAPH will illustrate the special construction for our Custom Screen Department.

FOR DOUBLE CORNER (3-FACE)

Fireplaces only, add the two dimensions below. Fill out "single corner" and "F" measurements also.

WIDTH	FULL	FLAT
	more than	less than
0-36" CH less sides =	6"	6"
36-40" CH less sides =	8"	8"
40-44" CH less sides =	9"	9"
44-48" CH less sides =	10"	10"

If Arch, we must have pattern. Patterns must be on stiff paper, not tissue or newspapers. Pattern must indicate if sketch is looking into or out of fireplace and which is right and left side of fireplace. Be sure that the pattern and sketch matches.
